## Introduction

## About Us

Urok Pharma is a leading pharmaceutical research laboratory and manufacturer based in Iraq. Established with the mission to make high-quality medications accessible to a broad patient base, the company upholds international quality standards, emphasizing efficiency, safety, and ethics. With an annual production capacity exceeding 60 million boxes and 900 million units, Urok Pharma is poised to become a primary supplier of pharmaceuticals to Iraqi hospitals.

Urok Pharma's mission is to provide safe, effective, and affordable pharmaceutical products while maintaining the highest quality standards. Its vision is to set a benchmark in quality, innovation, and ethics, advancing healthcare in Iraq. Urok Pharma's mission is to provide safe, effective, and affordable pharmaceutical products while maintaining the highest quality standards. Its vision is to set a benchmark in quality, innovation, and ethics, advancing healthcare in Iraq.

# About Product

## Empowering Health- care, Together

At Urok Pharma, our commitment is to provide safe, effective, and affordable medicines, ensuring compliance with international standards like GMP and HES systems.

### Enhancing Lives Through Innovation and Quality

Urok Pharma is dedicated to producing high-quality pharmaceuticals that adhere to international standards like cGMP, ensuring safety, efficacy, and reliability. With state-of-the-art facilities, a diverse product portfolio, and advanced packaging (e.g., Alu-Alu blisters), the company addresses local healthcare needs in Iraq. Committed to affordability, Urok Pharma offers cost-effective alternatives to originator drugs, making treatments accessible to a wider population. Through partnerships, widespread distribution, and support for healthcare

# Healthcare Partner

## Why Choose Urok Pharma?

Urok Pharma adheres to international standards such as GMP and cGMP, ensuring high-quality, safe, and effective pharmaceuticals through advanced manufacturing practices and regular compliance audits. The company offers cost-effective alternatives to branded drugs, making treatments affordable and accessible across Iraq, addressing 20-30% of the nation's pharmaceutical needs. Through innovative formulations, such as gastro-resistant capsules and Alu-Alu blister packaging, Urok Pharma ensures patient safety, product stability, and enhanced therapeutic efficacy, tailored to local healthcare requirements.

### Dolorok

Safe, Effective, and Affordable:  
Our products are manufactured to meet the highest standards,

**Powerful Relief, Affordable Care**

### Esorok

Targeted Action, Lasting Relief:  
Gastroresistant capsules ensure effective delivery where it's

**Precision Targeting for Acid Relief**

### Pregarok

Protected for Stability: Alu-Alu blister packaging maintains product integrity even in harsh

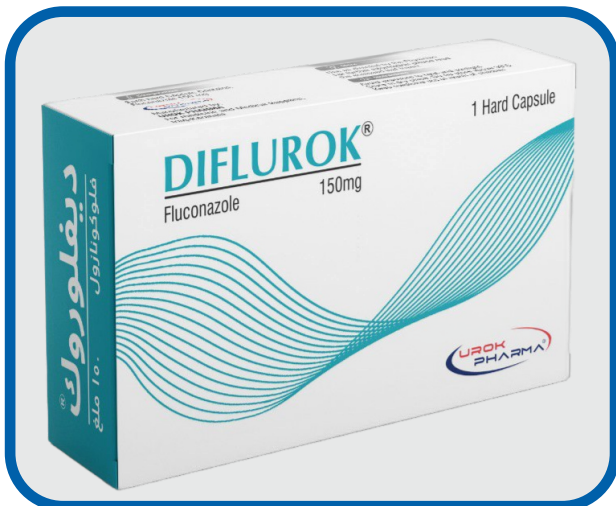

**Stability Meets Neuropathic Relief**

# Committed to Quality

## Urok Pharma's Trusted Products

At Urok Pharma, we provide a diverse range of high-quality, affordable medications designed to meet the healthcare needs of our communities. Our innovative packaging and advanced formulations ensure maximum efficacy and patient compliance.

### Diflurok (Fluconazole 150 mg)

- **Broad-Spectrum Antifungal:** Effective for vaginal candidiasis, cryptococcal meningitis, and systemic fungal infections.
- **Convenience:** Single-dose treatment for uncomplicated infections.
- **Rapid Action:** High bioavailability for quick symptom relief.

### Itrax (Itraconazole 200 mg) upcoming

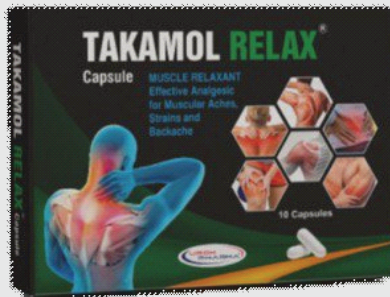

- **Potent Antifungal Therapy:** Ideal for aspergillosis, histoplasmosis, onychomycosis, and other severe fungal infections.
- **Enhanced Absorption:** Advanced formulation ensures effective treatment.
- **Versatile Use:** Suitable for both acute and chronic fungal conditions.

## Takamol Dolo

(Paracetamol 450 mg + Orphenadrine 35 mg)

- **Indications:**
  - Musculoskeletal pain
  - Tension headaches
  - Mild to moderate pain
- **Clinical Benefits:**
  - **Comprehensive Pain Relief:** Addresses both pain and muscle tension in a single formulation.
  - **Improved Quality of Life:** Helps patients resume daily activities without discomfort.

## Takamol Relax

(Paracetamol 500 mg + Chlorzoxazone 250 mg)

**Indications:**

- Muscular pain and spasms
- Musculoskeletal discomfort
- Post-exercise muscle stiffness

**Clinical Benefits:**

- **Dual Relief:** Targets pain and muscle spasms simultaneously for faster recovery.
- **Improved Mobility:** Restores comfort and flexibility in everyday activities.

## Takamol Sinus (New)

(Paracetamol 500 mg + Pseudoephedrine 30 mg)

**Indications:**

- Sinus pain and pressure
- Nasal congestion
- Headaches and fever due to colds

**Clinical Benefits:**

- **Comprehensive Sinus Relief:** Effectively reduces discomfort and congestion.
- **Improved Breathing:** Clears nasal passages, allowing for easier breathing.

## Takamol Relief (New)

(Paracetamol 500 mg + Caffeine 30 mg + Codeine Phosphate 10 mg)

**Indications:**

- Moderate to severe pain
- Tension headaches
- Migraines and dental pain

**Clinical Benefits:**

- **Comprehensive Pain Control:** Addresses pain effectively through a multi-mechanism approach.
- **Improved Daily Function:** Reduces pain intensity, allowing patients to resume normal activities.

## Pregarok 75 mg (Pregabalin)

### Indications:

- Diabetic neuropathy
- Fibromyalgia
- Post-herpetic neuralgia

### Clinical Benefits:

- Targets the root cause of nerve pain for lasting relief.
- Improves sleep and reduces associated anxiety.

## Neurok 300 mg (Gabapentin)

### Indications:

- Peripheral neuropathy
- Epilepsy (partial seizures)
- Post-herpetic neuralgia

### Clinical Benefits:

- Relieves pain and reduces the frequency of seizures.
- Enhances nerve health over long-term use.

## Mega B (New) (B-Complex with High Potency)

### Indications:

- Nerve health and repair
- Fatigue and energy support
- B-vitamin deficiencies

### Clinical Benefits:

- Improves energy levels and nerve function.
- Supports overall metabolic and cardiovascular health.

## Omy-Zol (New)

(Omeprazole 20 mg, 40 mg)

Indications:

- Gastroesophageal reflux disease (GERD)
- Peptic ulcers (gastric and duodenal)
- Zollinger-Ellison syndrome

Clinical Benefits:

- Provides consistent acid suppression for up to 24 hours.
- Promotes healing of ulcers and prevents recurrence.

## Esorok

(Esomeprazole 20 mg, 40 mg)

Indications:

- Severe GERD and erosive esophagitis
- NSAID-induced ulcer prevention
- Zollinger-Ellison syndrome

Clinical Benefits:

- Faster and more effective acid suppression.
- Reduces risk of gastric irritation and ulcers.

## LansoDex (New)

(Dexlansoprazole 30 mg, 60 mg)

Indications:

- Symptomatic GERD
- Maintenance of healed erosive esophagitis
- Acid-related disorders requiring long-term therapy

Clinical Benefits:

- Dual release ensures consistent acid control over 24 hours.
- Promotes healing and maintenance of esophageal health.

## Orocid (New)

Calcium Carbonate: 500 mg, Magnesium Hydroxide: 100 mg

Indications:

- Heartburn and acid reflux
- Indigestion and upset stomach
- Acid-related discomfort due to diet or stress

Clinical Benefits:

**Fast-Acting Relief:** Quickly alleviates symptoms of acidity and indigestion.

- **Portable and Convenient:** Chewable tablets are ideal for immediate use without water.
- **Safe for Daily Use:** Gentle on the stomach with minimal side effects.

## Vomit-Off 8mg (New)

(Ondansetron 8 mg)

Indications:

- Chemotherapy-induced nausea and vomiting (CINV)
- Postoperative nausea and vomiting (PONV)
- Nausea from acute gastroenteritis

Clinical Benefits:

- Provides fast and sustained relief from nausea and vomiting.
- Improves patient comfort during recovery or treatment.

## Vomit-Off 4 mg (New)

(Ondansetron 4 mg)

Indications:

- Chemotherapy-induced nausea and vomiting (CINV)
- Postoperative nausea and vomiting (PONV)
- Nausea from acute gastroenteritis

Clinical Benefits:

- Provides fast and sustained relief from nausea and vomiting.
- Improves patient comfort during recovery or treatment.

## Diarruk

(Loperamide 2 mg)

Indications:

- Acute nonspecific diarrhea
- Traveler's diarrhea
- Chronic diarrhea associated with IBS

Clinical Benefits:

- Restores normal bowel function quickly.
- Reduces fluid loss and dehydration risk.

## Dolorok (Paracetamol 500 mg)

### Indications:

- Headache and migraine
- Muscle aches
- Fever due to colds or flu

### Clinical Benefits:

- Restores comfort and daily function quickly.
- Suitable for all age groups when dosed appropriately.

## Mefuruk Capsule (Mefenamic Acid 500 mg)

### Indications:

- Dysmenorrhea (menstrual pain)
- Musculoskeletal pain
- Toothache

### Clinical Benefits:

- Reduces inflammation and pain efficiently.
- Ideal for short-term use in acute pain conditions

## Mefuruk Tablet (Mefenamic Acid 500 mg)

### Indications:

- Severe dysmenorrhea
- Postoperative pain
- Inflammatory conditions

### Clinical Benefits:

- Provides effective relief for moderate to severe pain.
- Anti-inflammatory properties promote faster recovery.
-

## **Zithruk (New)** (Azithromycin 500 mg)

Indications:

- Bacterial bronchitis and pneumonia
- Skin and soft tissue infections
- Sexually transmitted infections (e.g., chlamydia)

Clinical Benefits:

- Convenient once-daily dosing for shorter treatment duration.
- Reduces the bacterial load while minimizing side effects.

## **Ciprok (New)** (Ciprofloxacin 500 mg)

Indications:

- Urinary tract infections (UTIs)
- Respiratory tract infections
- Skin and soft tissue infections

Clinical Benefits:

- Quickly resolves bacterial infections with targeted therapy.
- Suitable for treating both acute and chronic infections.

## **Levarok (New)** (Levofloxacin 500 mg)

Indications:

- Community-acquired pneumonia (CAP)
- Acute bacterial sinusitis
- Complicated UTIs and pyelonephritis

Clinical Benefits:

- Provides long-lasting bacterial suppression with once-daily dosing.
- Ideal for managing severe or complicated bacterial infections.

### Dolostal Tab (New)

(Paracetamol: 500 mg, Chlorpheniramine Maleate: 2 mg and Pseudoephedrine HCl: 30 mg.)

#### Indications:

- 
- Cold and flu symptoms
- Sinus congestion
- Headache and fever
- 
- Clinical Benefits:
- Reduces nasal swelling and congestion for easier breathing.
- Alleviates headaches and other flu-associated discomforts.

### Vegarok Tab (New)

(Sildenafil 50,100 mg)

#### Indications:

- Urinary tract infections (UTIs)
- Respiratory tract infections
- Skin and soft tissue infections

#### Clinical Benefits:

- Quickly resolves bacterial infections with targeted therapy.
- Suitable for treating both acute and chronic infections.

### Oldafil Tab (New)

(Tadalafil 10,20 mg)

#### Indications:

- Erectile dysfunction (ED)
- Benign prostatic hyperplasia (BPH)

#### Clinical Benefits:

- Improves sexual function and urinary symptoms simultaneously.
- Long-lasting effects reduce the need for frequent dosing.

## D-Rok 5000 IU (New)

### Indications:

- Vitamin D deficiency and insufficiency
- Osteoporosis prevention and management
- Support for immune health

### Clinical Benefits:

- Promotes optimal calcium absorption for strong bones.
- Improves muscle function and reduces fall risk in older adults.
- Strengthens the immune system and supports overall health.
- For daily maintenance of Vitamin D levels

## D-Rok 10000 IU (New)

### Indications:

- Vitamin D deficiency and insufficiency
- Osteoporosis prevention and management
- Support for immune health

### Clinical Benefits:

- Promotes optimal calcium absorption for strong bones.
- Improves muscle function and reduces fall risk in older adults.
- Strengthens the immune system and supports overall health.
- For short-term correction of moderate deficiency

## D-Rok 50000 IU (New)

### Indications:

- Vitamin D deficiency and insufficiency
- Osteoporosis prevention and management
- Support for immune health

### Clinical Benefits:

- Promotes optimal calcium absorption for strong bones.
- Improves muscle function and reduces fall risk in older adults.
- Strengthens the immune system and supports overall health.
- For weekly therapy in severe deficiency cases.
-

## VitaRok (New)

### Indications:

- General health maintenance
- Nutritional deficiencies
- Fatigue and low energy

### Clinical Benefits:

- Promotes vitality and immune resilience.
- Fills dietary gaps in daily nutrition.

## Visiorok (New)

### Indications:

- Prevention of macular degeneration
- Eye strain from screen exposure
- General eye health maintenance

### Clinical Benefits:

- Protects against vision loss and supports long-term eye health.
- Combats damage caused by blue light and oxidative stress.

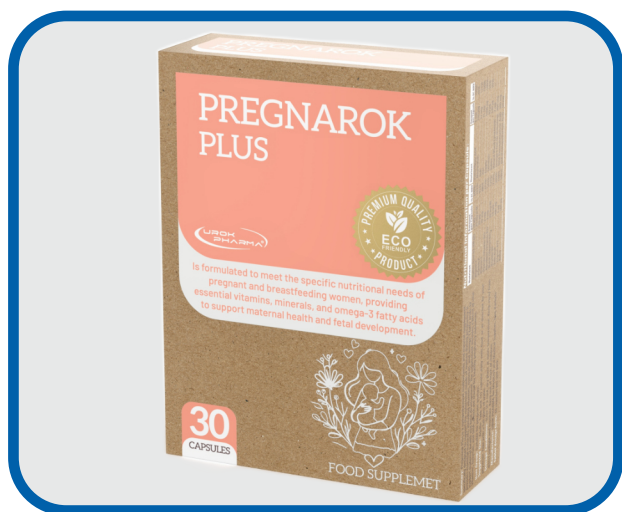

## Pregnarok (New)

### Indications:

- Pregnancy and breastfeeding
- Nutritional support for maternal and fetal health

### Clinical Benefits:

- Reduces risk of neural tube defects with folic acid.
- Promotes strong bones and healthy growth.

## Pregnarok Plus (With Omega-3) (New)

### Indications:

- Pregnant and breastfeeding women requiring enhanced nutritional support.
- Fetal brain and visual development.
- Prevention of iron deficiency anemia and neural tube defects.

### Clinical Benefits:

- Promotes healthy fetal development (brain, eyes, bones, and muscles).
- Reduces pregnancy-related fatigue and supports maternal health.

## Calcirok Forte (Calcium, Vitamin D, Magnesium, and Vitamin K2) (New)

### Indications:

- Prevention and management of osteoporosis.
- Enhancing bone strength and density in postmenopausal women and the elderly.

Supporting bone health during growth phases in children and young adults.

Reducing the risk of cardiovascular calcification.

### Clinical Benefits:

- Improves Bone Health: Ensures strong and healthy bones by optimizing calcium absorption and utilization.
- Prevents Osteoporosis: Reduces the risk of fractures and bone density loss.
- Promotes Cardiovascular Health: Prevents calcium deposition in arteries.
- Supports Overall Wellness: Contributes to muscle function and immune health.
- 

## Calcirok (New)
